## MC 501 Data Wrangling in R rubric

**50 points.** Due Monday, November 9, 11:59 PM.

**How this is scored.** Add the points from each row; the total is out of 50. A first attempt is graded forgivingly: a part that is there but incomplete earns partial credit, and 0 is kept for a part that is missing. Attempts are unlimited, so you can revise an early submission right up to the deadline.

- Before you submit: restart R, run the script top to bottom, and see what breaks.

*Data Wrangling in R, 50 points*

| Criterion | Exemplary | Proficient | Developing | Beginning |
|---|---|---|---|---|
| **1. Hand-code**<br>4 points | **4 points.** One variable hand-coded for a 30-message sample drawn with `sample_messages()`. | **3 points.** Hand-coded, but not drawn with `sample_messages()` or not 30 messages. | **2 points.** Codes described but not saved. | **0 to 1 points.** No hand-coding. |
| **2. Load**<br>4 points | **4 points.** The chat and stream tables loaded inside the script. | **3 points.** Loaded from a file on your own computer, so the script fails anywhere else. | **2 points.** Only one table loaded. | **0 to 1 points.** Not loaded in the script. |
| **3. Timestamps**<br>4 points | **4 points.** Converted from epoch milliseconds to a date-time, dividing by 1,000 first. | **3 points.** Converted, with a small error left, such as the time zone. | **2 points.** Converted without dividing by 1,000. | **0 to 1 points.** Not converted. |
| **4. Message length**<br>4 points | **4 points.** A new column holding each message's length. | **3 points.** Computed on the wrong field. | **2 points.** Computed but not saved as a column. | **0 to 1 points.** Missing. |
| **5. Join**<br>4 points | **4 points.** Stream information joined on, with a comment naming the key. | **3 points.** Joined, but no comment names the key. | **2 points.** The join matches nothing or multiplies the rows, unnoticed. | **0 to 1 points.** No join. |

| Criterion | Exemplary | Proficient | Developing | Beginning |
|---|---|---|---|---|
| **6. Missing values**<br>4 points | **4 points.** The count reported, and the decision stated. | **3 points.** Handled, but the count is not reported. | **2 points.** Dropped without saying how many. | **0 to 1 points.** Not handled. |
| **7. Export**<br>4 points | **4 points.** Saved as `twitch_analysis.RDS`. | **3 points.** Saved under another name or in another folder. | **2 points.** Saved in a format that loses the column types. | **0 to 1 points.** Not exported. |
| **8. Three reviewer-facing comments**<br>15 points | **15 points.** Three comments, each naming a decision a reviewer could challenge, the rule you applied, and why. | **11 to 14 points.** Three comments, but one states the rule without the reason, or names a decision nobody would question. | **8 to 10 points.** One or two comments, or comments that describe what the code does instead of a decision you made. | **0 to 7 points.** None. |
| **9. Clean-session run**<br>7 points | **7 points.** Runs start to finish after restarting R. | **5 to 6 points.** Runs after one small fix, such as a missing `library()` line. | **4 points.** Stops partway in a fresh session. | **0 to 3 points.** Runs only with objects already in your environment, or not at all. |
